ALUD400

Aluminum case with stacking corners - 400L

Aluminum trunk, 10/10 thickness, designed for secure transportation and storage of items. Features two straps to hold the lid when opened. Resistant to deformation, corrosion, and weather conditions. Reinforced corners allow for stacking of trunks. Equipped with stainless steel closure locks, optional locking mechanisms are available. The non-slip safety handles are foldable. Available in various capacities.

Customs code	7612908000
EAN	3321360023100

Color : Grey

Material : Aluminum

Secondary material : Polypropylene

Specifications :

- Trunk designed for safe transportation and storage of products.
- Two straps that secure the lid during opening.
- Resistant to deformation, corrosion, and weather.
- Reinforced corners.
- Equipped with stainless steel locking mechanisms.
- Foldable non-slip safety handles.
