

## RCX1000

### PE traffic cone with plastic base for weighting - 105 cm - orange

Polyethylene traffic cone with a base designed to be weighted (550 × 550 mm) and two Class 2 reflective strips for enhanced visibility day and night. Designed for marking out construction sites and roadworks, this sturdy cone is stable thanks to its base, which can be weighted with water or sand, and is easy to position or move. Can be fitted with stickers, chains, extendable barriers, a strap reel or site lights.
